

Unit FM4.07: Understanding financial management in facilities management

The assessment criteria form part of the unit and specify the standard that a learner is expected to meet to demonstrate that the learning outcomes within the unit have been achieved. The additional guidance, which is shown in brackets and italics alongside the assessment criteria, does not technically form part of the unit, in that it is not included in the reference version of the unit shown by the Register of Regulated Qualifications. The additional guidance is provided to illustrate how the assessment criteria might be interpreted. The BIFM will generally expect assessors to interpret the assessment criteria as described, or to an equivalent level of demand.

Aim of the unit:

This unit enables learners to develop knowledge and understanding of the principles and application of management accounting, the use of capital and revenue budgets, cash flow and the preparation of financial cases in a facilities management context.

Title:	Understanding financial management in facilities management	
Level:	4	
Credit Value:	6	
Learning outcomes	Assessment criteria	
<i>A learner when awarded credit for this unit will:</i>	<i>Assessment of this learning outcome will require a learner to demonstrate that they can:</i>	
1. Understand financial reporting systems and processes	1.1 Identify systems for the management of budgets and finances (<i>including cash accounts, nominal accounts (ledgers), VAT accounts, profit & loss accounts, balance sheets</i>) 1.2 Describe the use of financial information contained in management reports (<i>including budgeting, financial planning, business strategy, objective setting, pricing</i>) 1.3 Explain cost centres and devolved budgets (<i>supporting the explanation with example/s from the learner's own experience and/or case studies, and including reasons for the use of cost</i>)	

	<i>centres and devolved budgets)</i>
