

Business Risk Management and Recovery

2-day course

This course provides tuition for

IWFM level 4 qualification unit FM4.06

IWFM level 5 qualification unit FM5.04

See 'Professional Recognition' section below for details

Aim

1. To provide Facilities Managers with in-depth knowledge of the key requirements for effective implementation of business risk management and disaster recovery.
2. To introduce and explain the concept of risk management in respect of non-speculative risks as this relates to the IWFM Level 4 and 5 Learning Outcomes/Assessment Criteria.

Objectives

By the end of this course you will have an understanding of:

The principles of risk management

The Facilities Manager's responsibilities

Strategies for business continuity plans, reviewing and updating

How to restore services

Aspects of a disaster recovery plan

The systems and processes that need to be in place to manage the incidents, emergencies and disasters

The need to evolve and adapt to new threats

Description

No organisation is immune to severe disruption of its activities from unforeseen incidents that may develop into disasters. Government data suggests that organisations without an effected, tested emergency plan and trained staff have a high probability of failing should an emergency arise.

No responsible manager can afford to ignore the danger to employees, the loss of essential assets and the overall financial impact. Existing legislation (as well as standards imposed by Regulators such as the FSA) together with recent proposals for new legislation covering the management of major emergencies means that many companies will have to ensure that they are fully prepared for a disaster.

Have you planned for the impact on your own areas of responsibility and across the organisation? Does your company have an up to date plan to deal with current threats?

Content

Risk Management

- What is a risk?
- Different types of risk
- The principles of risk management
- The Facilities Manager's responsibilities
- How to reduce risk on a day to day basis
