

NEBOSH National General Certificate in Occupational Safety & Health

*A nationally recognised qualification accredited by NEBOSH
(National Examination Board in Occupational Safety & Health).*

11-day course

*This programme also provides tuition for
BIFM level 4 qualification unit FM4.05
See 'Professional Recognition' section below for details*

Course overview

The Certificate is a widely recognised qualification and provides an excellent basic grounding in the essentials of health & safety for personnel accountable for these responsibilities in their organisation.

This course is split into two weeks plus a day for the exam, and is an examined basic qualification for people involved in health and safety at work. It is designed specifically to provide the necessary knowledge for non-specialists to be able to understand and carry out their roles effectively in the work place.

In addition to the in-depth training we provide, NEBOSH expects all delegates to revise for the exams using the detailed course handbooks, and delegates will be set some homework which is designed to help prepare delegates for the examination day and post-course assignment.

Who the course is for

The course is targeted at managers, supervisors, safety representatives and any non-health and safety specialists who need a grounding and recognised health and safety qualification.

Course content

- Safety and health foundations
