

Overview of FM Compliance & Standards

Virtual Training – Four morning sessions

Aim

To give Facilities Managers an introduction and overview of the key statutory and mandatory responsibilities they may be required to manage, and in clear and simple terms provide them with the tools and knowledge needed to enable them to:

- Understand the areas they are responsible for
- Understand the legal requirements
- develop their own compliance checklists

Objectives

By the end of this course you will:

Understand the key facts about each compliance area

Understand what you need to do to ensure compliance with legislation, ACOP's and guidance

Understand the importance of record keeping

Understand where to find further sources of guidance and reference

Understand how to develop your own compliance checklist

Description

Regardless of the size of the building or the Facilities Management team, understanding and complying with legislation and standards is an essential requirement for all Facilities Managers.

From fire, lifting equipment, electricity, water, air conditioning and pressure vessels, it's critical that Facilities Managers understand not only what they have to do to keep their buildings safe, but also the required frequency of maintenance, testing and record keeping.

This practical course provides Facilities Managers with an introduction and sound basic understanding of key compliance management requirements and the knowledge to develop their own compliance checklist. Each session will provide an overview of key responsibilities for inspection, testing and maintenance and summary of relevant legislation, British Standards and Industry Guidance.

Sessions include delegate participation exercises which will enhance the learning experience and the practical application of the material presented.

Programme

Four Mornings 9:30-13:00

Introduction to Compliance
