

Financial Management 2 – Getting Results

1-day course

*This course provides tuition for
BIFM level 5 qualification unit FM5.05
See 'Professional Recognition' section below for details*

Aim

To help facilities managers to develop their understanding of business finance and accounting, and to explore ways in which a better grasp of financial information can be used to make a positive contribution to profitability, cash flow and capital investment.

Objectives

By the end of this course you will be able to understand:

What details to look for in company accounts

How to determine the financial performance and health of a business using key ratios

Where to find detailed financial information on companies

Analysing cash flow and related problems

How to build and use financial models and make a financial case to senior managers

How to analyse which activities are profitable and which are not

The basic principles of investment - what investors and other parties expect from companies and why. A brief look at market returns and capital asset theory;

Capital investment appraisals using discounted cash flow. How to do it, how it is used (including the venture capital pricing model), and some critiques

What happened during the banking crisis of 2008-9

Description

This course is intended for Facilities Managers who have a basic understanding of finance, and is ideally suited to those who have already attended our introductory 'Financial Management 1' course.

The course provides a refresher on key accounting principles before exploring the practical application of financial skills. Particular attention is given to techniques that managers can use to analyse and model cash flow and profit problems. Attendees are supplied with a number of spreadsheet tools which can be adapted to their own projects.

This course is particularly helpful to people having to prepare capital project budgets for the first time. It is relevant to managers having to write an investment case within an existing business, but also to start-up companies looking for external finance.

NB It is helpful if delegates can bring a lap-top computer to the course, although this is not essential and you will not miss out on anything if you cannot bring one.

Programme

09:00 Introduction

Workshop objectives
